Martin Holý

AI-Native Architect | Senior AI Software Engineer | AI Harnesses and Evals

Prague, Czechia (remote) | +420 792 305 456 | ylohnitram@gmail.com | ylohnitram.dev | linkedin.com/in/ylohnitram | github.com/ylohnitram

SUMMARY

Senior AI software engineer and AI-native architect. I build the harnesses that let LLM agents do real engineering work unattended, and the evals that show what they can and cannot do. Before AI I spent 15+ years in deployment automation, DevOps and platform engineering, including team lead and DevOps manager roles. Open to Senior AI Software Engineer, AI-Native Architect and CTO roles.

CORE SKILLS

AI	AI harnesses, LLM evals, multi-agent systems, Claude Code, MCP, OpenAI Agents SDK, guardrails, model routing, prompt injection testing
Engineering	Rust, TypeScript, Python, Bash, distributed systems, capability-based security, smart contract security
Platform	GCP, GKE, Kubernetes, Docker, Terraform, CI/CD, GitHub Actions, GitLab

EXPERIENCE

Senior AI Software Engineer, Avvoka — London Area, United Kingdom | **Mar 2026 – Present**

- Build a software factory, a GitLab-integrated **multi-agent harness** that writes, reviews and ships production code.
- Agent workflows around merge requests, CI feedback and code review, with guardrails and QA gates before anything lands.

AI Platform Architect, Replikanti — Prague, Czechia | **Nov 2025 – Present**

- Founder and lead architect of Agentis, an open-core agent platform with a 214,000-line Rust runtime. Its agent federations take GitHub issues to merged pull requests on their own.
- **AI SDLC harness** on Claude Code with 10 agents and human approval stops. sdlc-bench picks the cheapest model that passes each task class.
- dark-factory, an autonomous smart contract audit federation. Active on Immunefi, Sherlock and Cantina.
- MIE, a deterministic BTC market research engine in Rust.
- **interviewscam.com** (in development), a registry of fake job-interview scams that target developers.

Automation Engineer, Alma Career Czechia — **Sep 2018 – Dec 2025**

- Designed and operated a **self-service deployment platform** and introduced Kubernetes and Istio. Member of the architecture team.
- Early AI adoption. Claude for code and documentation, n8n workflows for GitHub Copilot usage reporting.

DevOps Manager, Home Credit International — **Sep 2017 – Jun 2018**

- DEV and UAT environments and infrastructure for Air Bank's international expansion. CI/CD, monitoring and incident management.

Application Support Team Lead, Home Credit International — **Mar 2013 – Aug 2017**

- Led a team of application specialists. SLA/OLA metrics, deployment automation, PROD releases with go/no-go decisions.

Senior Application Support Specialist, Home Credit International — **Jul 2012 – Mar 2013**

Infrastructure Engineer, IBM — **Mar 2010 – Jun 2012**

Technical Support Specialist, AVG — **Mar 2008 – Feb 2010**

PROJECTS

- **Rare-bug blindness eval** (micro1 Eval Hackathon, Nov 2026). Models found half of consensus audit bugs, 22% of rare ones.
- agent-mandate-evals (Oct 2026). Evals for paying AI agents, found and fixed a prompt injection redirect.

EDUCATION

Gymnázium Jateční, Ústí nad Labem

LANGUAGES

Czech (native), English (B2, professional), German (A2)
